&

- Fleet suppliers

Series of professional events by FLEET company cars magazine

- The Tour de Fleet series of specialized professional meetings organized by the FLEET firmni automobily (company cars) magazine consists of outdoor as well as indoor events serving as the tool to connect fleet suppliers with their current and potential clients - fleet operators and the owners of company cars. Each event mediates and supports mutual communication and networking and provides – together with printed magazine FLEET and internet portal iFLEET.cz – complex communication platform for wide variety of managers on both supplier as well as client side.
- Fleet Days (Den s Fleetem) are the core of the Tour de Fleet series, providing the attendants with unique opportunity to test try wide variety of cars of different segments and manufacturers. The events are also great opportunity for participating importers and fleet supplier representatives to introduce and explain their offering to the relevant business audience - to the present and, more importantly, prospective clients.
- The schedule of each Fleet Day is supplemented with presentations, specialized lectures, workshops and individual program of participating suppliers and partners. The Fleet Days are therefore great opportunity to address corporate management.

Program scheme

- Specialized lectures
- Product presentations
- Workshops and micro events
- Car test drives
- Separate activities at partner stands
- Business networking
- Supplementary program
